# Vontas OnRoute FieldOps

Keep your vehicles on track and on schedule

OnRoute FieldOps uses OpenStreetMaps to show where your buses are located.

Vontas OnRoute FieldOps (formerly OnRoute Supervisor) is a modern, web-based application designed to monitor vehicle movement and manage incidents in real time. It empowers supervisors to stay connected with dispatchers and operators throughout service, enabling dynamic support and helping ensure routes stay on track. Eliminate time-consuming manual tasks and reduce human error with a tool built to keep your services efficient and your fleet running smoothly. Accessible via secure connection on both office laptops and field tablets, FieldOps is built for wherever the job takes you.

By integrating seamlessly with Vontas OnRoute, FieldOps leverages real-time data to deliver a comprehensive view of your fleet. This visibility equips your agency with valuable insights that can be shared with riders to enhance their experience. With FieldOps, you can keep your operations running smoothly for both operators and the communities you serve.

Overview

Real-Time Tracking Information

- OnRoute FieldOps provides a wide overview of real-time information on your vehicles.
- Whether it's a laptop in a vehicle, or on a tablet out in the field, you can track your fleet and know where your buses are and how they are running on schedule.
- Keep your routes on time and avoid missing buses due to vehicle breakdowns, lack of operations, or a bus running early.

Create Service Disruptions On the Move

- Draw the detour path on a map from your tablet device.
- After creating the detour, have your system record it and it will auto-generate it for future rides.

Track and Secure Data

- OnRoute FieldOps uses OpenStreetMaps to show where your buses are located.
- Application includes a Vehicle Tab that has a menu with details on your fleet.
- View information on each bus with data that is customizable to your agency.
- Search by Bus Number, Operator, Route, etc.
- Keep track of when buses are arriving, leaving, on-time, behind schedule, etc.

Agency Benefits

Keep Buses On-Time

Support your operations by keeping them on schedule and preventing buses from running late.

Bridge the Communication Gap

Bridge the communication gap and eliminate guess work. Know where your buses needs to be and who needs help.

Remote Access Anywhere

Access FieldOps from any location with a secure connection and keep track of your vehicles, whether you're in the field, in the office, or even at home.

Operator Benefits

Accurate, Real-Time Passenger Information

Utilize the data you gain from FieldOps to make decisions that improve and enhance the service for your riders.
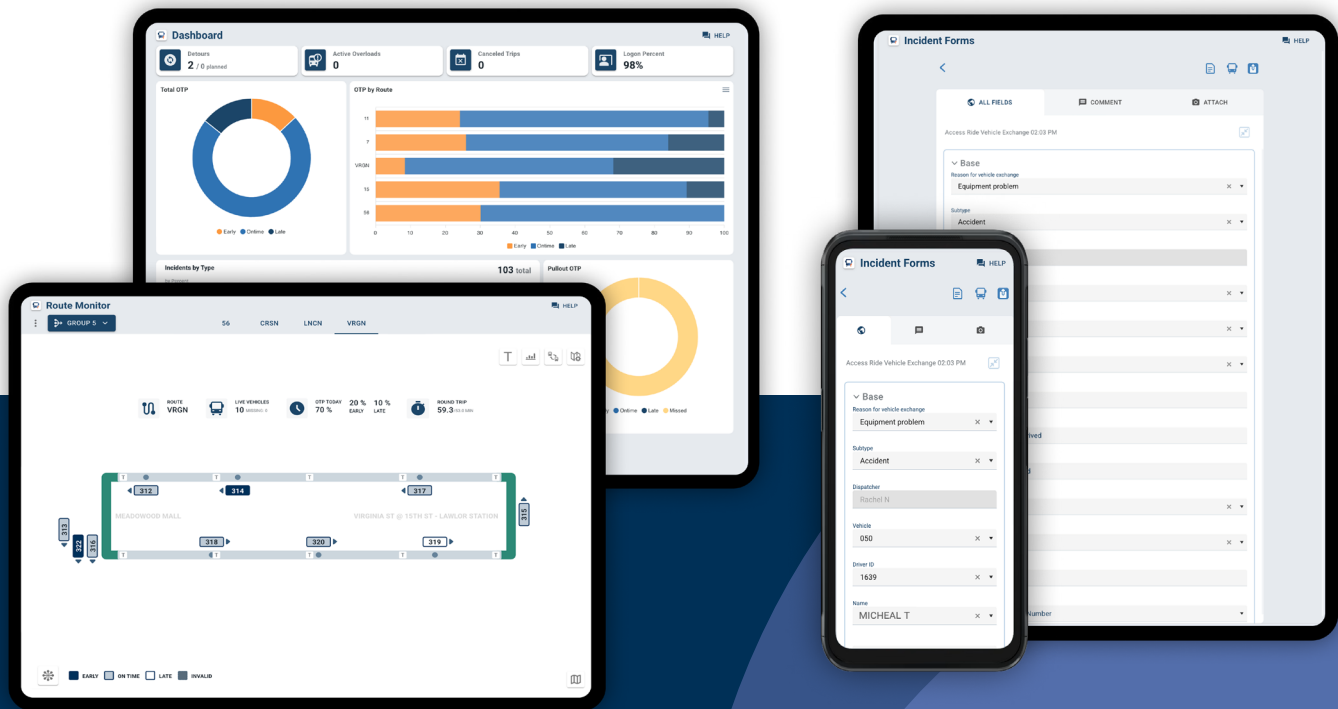

Reliable Service During Unexpected Events

Retain your passengers' trust by efficient service in the wake of an unexpected event where buses need to go elsewhere and changes are made to the schedule.

Communicate Service Disruptions

By communicating disruption, your riders will have more confidence in your service and be able to plan their day accordingly.
