

Next Stop Annunciation

Increase passenger confidence
with clear, accurate on-board
announcements

When on board, your riders want trip information at the ready so they can seamlessly complete their journey. They want to know what stop is next or how many stops to go before they get off. Vontas OnRoute Next Stop Annunciation provides clear, precise aural and visual route and stop messages for automatic, on-board playback to keep your riders fully informed throughout their ride. Passengers will see the messages scroll as they hear them to ensure an informed transit experience.

Next Stop Annunciation is designed to comply with Americans with Disabilities Act (ADA) and Accessibility for Ontarians with Disabilities Act (AODA) requirements and associated FTA rules governing essential communication to riders. It also can be used to convey public safety messages, service messages, or provide advertising or promotional information.

Overview

Automate On-Board Messaging

- Fully automates announcements, provides for manual capabilities
- GPS-based system ensures precise location tracking
- Automatically adjusts time of day and ambient noise volume; enables multilingual messaging
- Runs location-based ads or messaging for revenue enhancement

Easily Deploy and Maintain

- Software requires minimum set-up from transit system staff to prepare messages; simple interface to the Vontas OnRoute mobile platform
- Vontas provides complete customer service support

Clearly Display Route/Stop Information

- Large LED amber or red displays provide accurate route and location-based information
- Provides various LED pixel sizes and character heights to meet customer requirements
- Features multiple character width and graphic capabilities for red or amber displays
- Works with a variety of sign types with variable sign lengths and character sizes available

Agency Benefits

Full ADA/AODA Compliance

Provides accessible travel information for passengers with visual or auditory challenges. Meets all Americans with Disabilities Act (ADA) and Accessibility for Ontarians with Disabilities Act (AODA) requirements. Full ADA and FTA compliance to 49CFR 37, 167 and 38.35.

Increased Operator Efficiency

A fully automated system minimizes operator intervention as well as the need for passenger queries, enabling drivers to focus on service.

More Convenient Transit for All Riders

On-board audio and visual messages help your passengers easily ride. Providing clear route and stop announcements helps ensure they don't miss stops, especially if they're on a route for the first time.

Passenger Benefits

Fully Informed Riders

- Provides passengers with real-time stop information so they know when to get off the bus
- Periodically displays public service announcements of upcoming community bulletins and events

Shorter Dwell Times

- Alerts passengers of their impending stop, gives them time to prepare to alight

Increased Passenger Confidence

- Helps passengers identify their stop, reducing uncertainty
